## NICHOLAS PETOSA

EDUCATION	
AUG 2018 – DEC 2019	Georgia Institute of Technology – M.S. in Computer Science  • Specialization in Machine Learning.
2015 – 2018	Georgia Institute of Technology – B.S. in Computer Science – GPA: 4.0/4.0
EXPERIENCE	Concentrations in Artificial Intelligence and System Architecture.
SUMMER 2018	Microsoft – Software Engineer Intern – <i>PowerBI Advanced Analytics</i>
	<ul> <li>Deep Learning &amp; Natural Language Generation. Designed and trained a deep LSTM network to generate English descriptions of data visuals with 95% accuracy and strong generalization.</li> <li>Transparent Modeling. Implemented a deep general additive model (GAM) classifier in CNTK that will empower PowerBI users to build transparent, accountable models of their data and to visualize each feature's non-linear contribution towards the final classification.</li> </ul>
SUMMER 2017	<ul> <li>Amazon – Software Development Engineer Intern – Customer Account Protection</li> <li>Machine Learning. Integrated a random forest classifier into Amazon's production sign-in systems, which handles millions of sign-ins per day. The model predicts whether clusters of customers are malicious and suggests disciplinary action to Amazon fraud investigators. Used scikit-learn and Weka.</li> <li>Data Visualization. Created interactive suspicious account cluster visualizer using d3.js. Integrated</li> </ul>
	internally into dashboard used by hundreds of Amazon fraud investigators.
SUMMER 2016	Cisco – Software Engineer Intern – Global Support Experience  • Data Science. Created an internal web app using R and Shiny for measuring partner performance.  Cisco executives estimated the tool would save \$150k per quarter.
RESEARCH	<ul> <li>Web Development. Redesigned a service wrapper with high visibility within Cisco with Java Spring.</li> </ul>
JAN 2018 - PRESENT	<ul> <li>Graduate Research Assistant – Georgia Tech – Quantitative Software Research Group</li> <li>Research the application of deep learning techniques to quantitative finance under Dr. Tucker Balch.</li> <li>Implemented a deep Q-learning trading agent from scratch using Keras and Zipline.</li> <li>Investigate applications of time series classification, deep reinforcement learning, and anomaly detection to the lab's stock market exchange simulator.</li> </ul>
AUG 2016 - AUG 2017	<ul> <li>Undergraduate Research Assistant – Georgia Tech – Sherrill Group</li> <li>Designed, developed, and implemented a Python Flask service and MongoDB back-end for PSI4, a popular quantum chemistry research package. Published undergraduate thesis on this research.</li> </ul>
MAR 2016 - MAR 2017	<ul> <li>Undergraduate Research Assistant – Georgia Tech – Contextual Computing Group</li> <li>Researched accessibility technology for the hearing impaired and created software tools and applications for the deaf. Built a cross-platform mobile app with lonic which reads text from pictures and converts it to sign language.</li> </ul>
ADDITIONAL EXPERIENCE	
AUG 2018 - PRESENT	Graduate Teaching Assistant – Georgia Tech – CS 4646: Machine Learning for Trading  • Will be grading assignments, answering questions, and holding regular office hours for the course.
SPRING 2017 AWARDS	<ul> <li>Google CodeU Participant</li> <li>A Google invite-only program. Worked remotely with a small group of peers to create a messenger web app over the 12-week program. Participated in regular code reviews with a Google engineer.</li> </ul>
FINRA Data Analysis Prize (HackGT Hackathon 2017) ● First Place (Coca-Cola CoolerHacks Hackathon 2016) ● Firehase Prize	

FINRA Data Analysis Prize (HackGT Hackathon 2017) • First Place (Coca-Cola CoolerHacks Hackathon 2016) • Firebase Prize (MHacks: Refactor Hackathon 2016) • First Place (SwampHacks Hackathon 2016) • Yik Yak Prize (HackDuke Hackathon 2015)

## SKILLS

**Programming Languages –** Python, Java, JavaScript, C

**Tools & Platforms** – Keras, PyTorch, TensorFlow, CNTK, d3.js, Zipline, scikit-learn, Flask, MongoDB, Git **Areas of Interest** – Quantitative Finance, Deep Learning, Machine Learning, Artificial Intelligence, Data Visualization
